

Day – 16 :

Logical Operators in

SQL

Logical Operators

Operator	Description
AND	All conditions must be true
OR	At least one condition must be true
NOT	Negates the condition

Logical Operators

Operator	Description	Example	Result
AND	All conditions must be true	SELECT * FROM employee2 WHERE age > 25 AND salary > 50000;	Both conditions true
OR	At least one condition must be true	SELECT * FROM employee2 WHERE age < 25 OR salary < 40000;	One or both true
NOT	Negates the condition	SELECT * FROM employee2 WHERE NOT (department = 'IT');	Excludes IT department
